

CLINICAL MULTIPLE CHOICE EVALUATION

LECTURE 7 OF 20: WOUND DRESSINGS SELECTION & FORMULARIES

Candidate Instructions

- This exam paper contains **25 strict Multiple Choice Questions** matching the 2025 dressings curriculum.
- All product names, conversion actions, timeline records, and formulary guidelines are grounded 100% in your slides.
- Select the single best answer choice (**A, B, C, or D**) for each clinical question.
- The full validation key matrix block is isolated at the absolute end of this booklet.

QUESTION 1

According to the four basic principles of wound care detailed on Slide 3, what specific clinical action is mandated if a wound is evaluated as being "too dry"?

- A) It will require aggressive absolute absorption using specialized hydrofibres
- B) It will need hydration
- C) It requires immediate debridement utilizing a Debrisoft lolly
- D) It must be packed with a dry alginate sheet until a gel forms naturally

QUESTION 2

If a wound produces excessive exudates (wound fluid), what basic principle of wound care must be applied?

- A) This needs to be absorbed
- B) The wound must be hydrated via hydrogels immediately
- C) An interactive silicone scar protectant spray should be applied
- D) The clinician should treat it with a basic layer of dry Jelonet gauze

QUESTION 3

The basic principles state that if a wound has necrotic (dead) tissue or slough (yellow debris), what explicit action is required?

- A) Application of a liquid film protectant layer to lock in moisture
- B) It will need debridement
- C) Immediate coverage using high-flow iodine ointments exclusively
- D) The termination of all clinical cleaning and irrigation solutions

QUESTION 4

Under the 4 basic principles, if a wound is identified as being actively infected, what clinical intervention is required?

- A) Hydration using a non-sting incontinence cleanser foam spray
- B) It needs to be treated with the appropriate antibacterial agent
- C) Immediate surgical containment via primary intention adhesive tape strips
- D) Closure of the tissue using specialized scar silicone management sheets

QUESTION 5

To accurately answer questions regarding a wound's hydration, exudate, slough, or infection status, what must a nurse complete first?

- A) A local box stock count inside the central dressing cupboard
- B) A full holistic wound assessment using T.I.M.E.R.S and/or T.I.L.I.
- C) An independent telephone log query directly to a regional pharmacy board
- D) A manual script translation of the Greater Manchester formulary index codes

QUESTION 6

In what specific month and year was the Greater Manchester (GM) regional wound care formulary formally created?

- A) October 2018
- B) October 2020
- C) January 2022
- D) June 2025

QUESTION 7

What core problem or clinical challenge across the trusts was explicitly recognized as the driving reason behind creating the GM formulary?

- A) A severe global shortage of foam-bordered dressing materials
- B) There was a disparity in care across all the trusts, meaning if a patient was discharged from one area to another there was no continuation in care
- C) The rapid escalation of pricing tiers for basic medical adhesive removal wipes
- D) Conflicting legal criteria separating student nursing administration borders

QUESTION 8

How are specialist products visually highlighted or designated within the official wound care formulary documentation?

- A) Underlined in bright blue text
- B) Highlighted in Yellow
- C) Stamped with a red clinical advisory symbol
- D) Tabulated inside an italicized appendix folder block

QUESTION 9

What explicit protocol must a healthcare practitioner follow on occasions where a patient requires a specialist product outside the main formulary?

- A) Procure any available generic alternative from the nearest floor cupboard independently
- B) The healthcare practitioner must contact the Tissue Viability Nurse or other specialists
- C) Manually re-authorise the prescription chart logs without external consultation
- D) Request a family relative to purchase the product from an external commercial outlet

QUESTION 10

Which of the following correct groups of specific products are explicitly listed under the 'Absorbent dressings' category?

- A) Jelonet, K-band, and Viscopaste PB7
- B) Xupad, Eclypse, C-sorb, Zetuvit plus, Tegaderm absorbent, and KerraMacCare
- C) Inadine, Iodoflex, Iodosorb, and Medihoney HCS
- D) Intrasite Gel, ActivHeal Hydrogel, and Hydrosorb Comfort

QUESTION 11

What is the primary role and function of the Appeel medical adhesive remover line (Sachets, Foam applicator, Wipes, Aerosol)?

- A) To deliver chemical debridement to thick adhered slough layers
- B) Facilitates the quick and easy removal of adhesive medical devices and dressings
- C) To irrigate heavily contaminated puncture tracks before packing rounds
- D) To apply a non-sting barrier film over deep incontinence excoriations

QUESTION 12

What specific functional transition and physical property defines the action of 'Alginates' like Kaltostat and CovaWound?

- A) They are highly fluid ointments that solidify into hard plastic shells upon skin air exposure
- B) Alginate dressings are dry until they meet fluid in which they absorb and become a gel
- C) They release active osmotic honey molecules to break down surrounding healthy skin margins
- D) They form a thin, non-adherent grease film over superficial infant abrasions exclusively

QUESTION 13

Which of the following contains the complete, correct list of products displayed under the Iodine slide section?

- A) Flaminal Forte, Suprasorb C, and UrgoClean rope
- B) Inadine, Iodoflex, and Iodosorb (Ointment, Powder, Dressings)
- C) Aquacel Extra, Durafiber Ag, and Aquacel Ag+ ribbon
- D) Granuflex Bordered, Comfeel Plus, and DuoDERM Extra Thin

QUESTION 14

What explicit underlying biological/physical action mechanism is listed on Slide 10 for Honey (Medihoney HCS)?

- A) Angiogenesis suppression
- B) Osmosis
- C) Phagocytic lysis
- D) Capillary thermal constriction

QUESTION 15

Which individual product is uniquely listed on Slide 11 under the category "Basic dressings"?

- A) Viscopaste PB7
- B) Jelonet
- C) Opsite Flexigrid
- D) CliniSorb

QUESTION 16

K-band, K-soft, K-lite, Stockinette, and Clinifast (Blue/Yellow/Red) are all explicitly tabulated under which category heading?

- A) Compression bandages
- B) Bandages
- C) Interactive Dressings
- D) Exudate management

QUESTION 17

Viscopaste PB7 bandage, Ichthopaste, and ZipZoc are grouped together as examples of what specific class of items?

- A) Film Dressings
- B) Medicated bandages
- C) Hydrofibres
- D) Hydrocolloids

QUESTION 18

What absolute structural mandate and clinical practice alert note is explicitly appended to the 'Compression bandages' slide?

- A) Compression bandages must be pre-heated to match core temperature baselines
- B) Special training is needed to apply compression therapy
- C) They can only be used on primary intention surgical lines under 3 weeks old
- D) Student nurses are legally permitted to execute multi-layer wrapping unsupervised

QUESTION 19

Which of the following contains products listed under the 'Debridement' slide category?

- A) Appeel Sachets and medical adhesive wipes
- B) Debrisoft pad, UCS Debridement pad, and Debrisoft Lolly
- C) CliniSorb dressing and CarboFlex charcoal blocks
- D) BAPScarCare Gel and SilDerm Scar Spray

QUESTION 20

Which individual dressing is uniquely specified under Slide 16 for the focused category of "Exudate management"?

- A) Jelonet strip
- B) Mepilex Transfer dressing
- C) Granuflex Bordered matrix
- D) Cavilon Advanced liquid dressing

QUESTION 21

Biatain-ibu non-adhesive dressing is explicitly listed under which specific category folder block on Slide 18?

- A) Hydrofibres
- B) Foams
- C) Hydrocolloids
- D) Gels

QUESTION 22

Granuflex Bordered, Granuflex (modified), Comfeel Plus, and DuoDERM Extra Thin belong to which distinct product family?

- A) Interactive Dressings
- B) Hydrocolloids
- C) Odour control
- D) Wound Cleaning / Irrigation

QUESTION 23

Which specific pair of clinical dressings are designated under Slide 21 for the distinct purpose of "Odour control"?

- A) Jelonet and Opsite Flexigrid
- B) CliniSorb dressing and CarboFlex dressing
- C) Prontosan and Octenilin solutions
- D) K-soft and Stockinette rolls

QUESTION 24

Flaminal Forte/Hydro, Suprasorb C, UrgoClean, HydroClean plus, UrgoClean Ag, Urgotul Silver, and UrgoStart belong to which category heading on Slide 22?

- A) Scar management
- B) Interactive Dressings
- C) Skin protectant
- D) Absorbent dressings

QUESTION 25

Which of the following complete sets of products are grouped together under the 'Hydrofibres' category slide?

- A) Intrasite Gel, ActivHeal Hydrogel, and Hydrosorb sheet
- B) Aquacel Extra, Aquacel Ag+ Ribbon, Aquacel Ag, Durafiber Ag, and Aquacel Ag+ Extra dressing
- C) Cavilon Advanced liquid dressing, Medi Derma-S, and Medi Derma-Pro incontinence cleanser
- D) Appeel wipes, sachets, foam applicators, and aerosols
